

Dear Dr Di Cera,

I am attaching my CV for consideration to serve as a member on the RPC.

I have served on NIH Study Sections, both as a regular member (that ended this May), and on an ad hoc basis, since 2003. I have also reviewed NIH proposals in special emphasis panels. My expertise is in HIV biology particularly in the areas of virus assembly, RNA transport, and creation and use of novel gene delivery systems. I have recently embarked on deriving induced pluripotent stem cells- this is an area in which I feel I may be able to provide some feedback as well.

If the committee feels that I can contribute positively to achieving its goals, I would be willing to serve as a member.

Yours truly,
